www.FertilityEHR.com
Created & built to handle the intricate needs of your fertility practice. Our advanced fertility software allows you to run your practice the way you envision it.

**ART DOCUMENTATION**

Document your patient’s ART procedures easily, quickly, and securely. Our ART Lab Management module is a comprehensive package of tools that help you improve and streamline your documentation and monitoring processes.

- Document and manage cryo storage inventory in-and-out of your clinic.
- Manage all activities related to the life cycle of the embryo.
- Monitor and plan activities, tasks, and patient schedules.

**PACKAGE MANAGEMENT**

Keep your cashflow organized with efficient tracking resources. Easily categorize procedures according to cycle type, and use custom predefined treatment packages.

- Customize packages based on patient’s preference.
- Quickly and easily provide an instant quote for any package.
- Instantly apply discounts to packages.

**QUICK BILLING**

Automate your billing process by directly billing patients for the care they received right after their visit, before they get from your office to the receptionist. Seamlessly print detailed invoices and receipts for your patients’ satisfaction.

- Receive automated, system-generated notifications for unpaid services or outstanding bills.
- Update package balances.
- Remove or alter payments on packages for discontinued treatments.
and organize patient information in detail. Reduce liabilities, improve data management, and deliver better care.

**STIM MANAGEMENT**
Customize, assign, and effectively track your patient’s stim plan.
- Manage IVF, FET, Ovulation, and Donor.
- View previous and current stim plans for each patient.
- Lab test results are automatically added in the patient’s stim sheet. Patient stim sheets are automatically updated as results come in, effortlessly and immediately delivering these results.

**CYCLE MANAGEMENT**
Effectively manage your patients’ cycles. Customize, assign, and easily monitor your patients’ cycles.
- Manage procedure cycle.
- Start and close patient cycles.
- Review patient’s previous cycles.

**COMMUNICATE**
Stay in touch and actively engage your patients in their care.

**CAREPORTAL**
Bring your pre-registration process and other services online with FertilityEHR’s online patient portal, CarePortal.
- Reduce waiting time.
- Provide 24/7 access to patient information.
- Easily retrieve visit information.

**INTOUCH**
Stay in touch with your patients, make sure they don’t miss an appointment. InTouch facilitates your clinic’s SMS and email communications with your patients.
- Patients receive notifications for new notes, reminders, and tasks.
- Send reminder to patients for appointment.
- Receive notification once patient checks in.
